What attracted me most to Symmetry was the **ability to make a lot of money quickly** and to be able to work as a team with a large group of people enabling them to also make money quickly. The products are unique and stand on their own without a lot of hype. My goal is to **double what I did this past year** and to raise up an army of others doing the same!

The bottom line of what makes me get up in the morning and carries me through the day is that this is a ministry for me. It's about how many other people I can find, who need what I have. And what's most amazing is that almost every person I talk to fits that category. This is **WHY I do the business**: bringing freedom to others: financially, spiritually, physically and emotionally. My **HOW to do the business** is the training I receive from my mentor, Dani Johnson. With her strategies, skill and training there is nothing I can't handle in my business. My business has become very **streamlined, simple and successful**.

I would encourage everyone to get very specific as to **WHY** they want to own their own business and earn an additional income. Once you find the **WHY**, you'll be motivated to get the skill and training you need to be a professional at what you do at Symmetry. Whether its 10 hours per week or 40 hours, it doesn't matter. Working with my mentor, Dani, has helped me to make **6-figures in less than 10 months**. I've been able to **pay off \$ 86,000 in debt in 11 months**. All I know is that you owe it to yourself to get involved in this business and get some training. If you have goals that are presently bigger than your ability, training is your answer, bottom line.
