Prior to getting started in business for myself, I was actively raising my 11 children, and desperately looking for a way to bring in a significant income, while being able to stay at home and keep my family's priorities. Because children are NOT cheaper by the dozen, I did not have time, or money to waste. With my husband being active in duty military, going outside the home to work simply was not an option. I got started at the top package with Symmetry, and went from SMM to FVP in 5 months! Symmetry's commitment to paying out significant income, along with bonuses, incentives and trips, had made it exciting to watch my business grow! My weekly checks just keep getting bigger and bigger, and I have been in the top 5 on the bonus charts two times in 5 months.

Of course none of this would be possible with out plugging in daily to my trainer Dani Johnson. I am now equipped on how to strategically manage my time in such a fashion that I could work SMARTER, and not HARDER. I work part time about 15 hours a week.

My husband told me last year that people do not value training. He explained to me that in his line of work, without proper training, people die. I found it to be true that **without proper training in this industry, peoples' business DIE.** I am happy to say that for the first time in years, **our family has hope for the future,** and many of our financial worries are disappearing.

I have an incredible team leader, Sandi Krakowski, who leads by example and has built an incredible team on the turn key system of training. **Nobody ever has to wonder what their next step is if they want to make money with Symmetry.** Sandi believed in me enough to encourage me to plug into that system, and **now I am making some great money.** We appreciate being with a great company, like Symmetry, with great products, incredible service and an beneficial and easy plan to follow.

I would encourage anyone who wants to take full advantage of everything Symmetry has to offer to **get some great training, plan your work, and work your plan!** Thanks so much Symmetry!
